## Product Description

The Aleesia Illumia features a classically styled limestone surround with built in decorative halogen lights. This 4.2kW highly efficient landscape gas fire benefits from virtually invisible non reflective glass, along with highly detailed ceramic logs.

Captivating flames flow throughout the fuel effect and enhance the interior lining creating reflection in the black enamel, or light and shadows in the cream vermiculite, or rustic brickwork.

It is operated by a multifunctional remote control system with thermostatic and timer functions allowing you to pre-set your desired room temperature and control when the fire turns on and off.

Available surround widths are 58 inches, or 54 inch to fit smaller rooms or a narrow chimney breast.

A thermostatic remote control system allows you to select the times you want the fire to automatically turn on or off with pre-set temperature functionality to select your desired heating comfort level.
