## Product Description

### SLE55I BESPOKE LUXURY ELECTRIC INSET

The SLE55i features our etronic effect technology and mirrored glass for an ultra realistic, relaxing flame pattern. The new slimline heater has been neatly disguised at the top of the flame screen meaning that there is no need for a canopy. This new canopy-less design provides an uninterrupted view of the flame pattern whilst still delivering 1-2kW of heat.

The SLE55i has a generous 22 inch fuel bed, giving the appearance of a much wider fire whilst still fitting into a standard inset opening for maximum flexibility. All fires come with an intuitive remote, choice of coal or log fuel bed and the ability to adjust the flame and fuel bed brightness to create the perfect ambience. For efficient and automatic control, it also features a 7 day programmer.

Available with our new premium fascias in a variety of styles and finishes to complement any home.
