Product Description

The Alameda electric suite is a gorgeous and complete offering from Dimplex. Acting as a dramatic focal point for any space, the suite incorporates the incredible visual effects available from the Optimyst range, in a beautifully finished stone effect surround. You also have the option of utilising the brick effect back panel, which is removable if you desire a sleek matt black finish instead.

The fire can operate via a remote control and can even be used independently of the fully concealed 2kW heater, meaning you can enjoy the classic feel of the fire all year round.

The thermostatic controls mean you can set your fire to produce heat when the room drops to a certain temperature, helping to maintain comfort in your home. The design is elegant yet simple, blending in perfectly with any interior design.

The Dimplex Optimyst range is state-of-the-art, using established ultrasonic technology to create an ultra-fine water mist that rises up and works with the under fuel bed lighting to give a fully three dimensional fire effect. The result is so authentic that it is regularly mistaken for true flames and smoke.
