Product Description

The Dimplex Bari Optiflame electric stove has a classic modern design perfect for all interiors. With an opening door and chrome detailing, this stove really looks the part.

It's simple plug in and go installation means that it can be placed anywhere in the room, near a plug socket and offers a gentle burst of heat to take the chill out of the room.

The Dimplex Bari electric stove comes with an easy to use remote control as standard to operate the heat and light settings. It features 2 heat settings, 1kW and 2kW, and can also be used without any heat should you want to use the stunning Optiflame effect by itself on those warmer evenings.

The highly realistic log effect fuel bed makes this stove almost identical to a real wood burner.

This product is only suitable for well insulated spaces or occasional use
