Product Description

Dimplex introduces the stylish Sunningdale, an electric stove with an outstanding flame effect courtesy of its award-winning Opti-V technology. The Sunningdale cleverly uses the latest in High Definition TV technology to create ultra-realistic flickering flames in a 3D bed of logs.

The Opti-V technology creates a virtual fireplace experience like no other. With ultra-realistic flames and sparks jumping and flickering amongst the LED logs that sporadically spark! With the sound of crackling logs emanating from the Sunningdale the illusion of a real fire is complete.

Quick and easy to install, the Sunningdale simply needs to be plugged in to deliver its realistic flame effect. Available in a graphite cast-iron effect, with metallic detailing, the Sunningdale stove's fan heater offers a 2kW heat output. Homeowners can control the stove from the comfort of their chair with the remote control unit, with the option to turn off the heat but retain the ambience of a burning fire all year round.
