

ELEMENT 4

Element4 Summum 140T

Element4

RRP from £8679 (Contact us for our discounted price)

Product Description

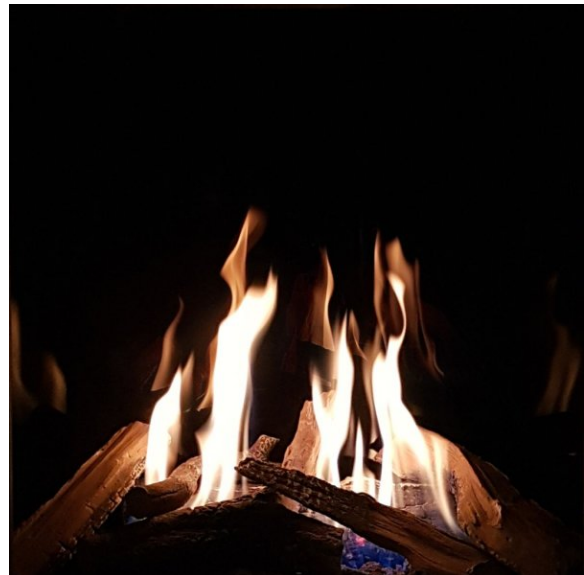

This double sided tunnel gas fire is perfect to be installed as a 'hole in wall' design.

Being balanced flue, this fire would generally need to be installed into a false chimney breast, made from 1000 degree rated materials. The construction of this wall is a specialist task and should not be carried out by an inexperienced gas engineer.

There is also the option of installing within an existing chimney breast and using a chimney renovation kit to convert your conventional flue to work with a balanced flue fire.

We offer a full design service and can build your vision from start to finish.
