## Product Description

The Loft gas stove's tall firebox is framed with reflective black glass, adding a striking two-tone contrast to the matt steel body. Soaring flames dance amongst a highly realistic fuel bed, composed of hand painted realistic logs. Visuals are mirrored on all sides by the EchoFlame Black glass lining – a continuation of the stove's glossy exterior styling details.

Loft stoves can be styled with a variety of accessories, offering a range of luxury options for your gas stove. You can choose to mount your stove on a range of cleanly styled Plinth and Logstore bases, with either option offered in matching steel, a smart Castillo grey sandstone or luxurious Woodgrain sandstone.
