Product Description

The Oakhurst is a beautifully simple electric stove, based on a classic cast-iron design. With a contemporary matt black finish and real working doors; it's a look to suit any interior scheme.

This fire can operate via a remote control and can even be used independently of the fully concealed 2kW heater, meaning you can enjoy the classic feel of the fire all year round.

The thermostatic controls mean you can set your fire to produce heat when the room drops to a certain temperature, helping to maintain comfort in your home. The cast iron style is a traditional classic, fitting in with any interior.

The Dimplex Opti-myst range is state-of-the-art, using established ultrasonic technology to create an ultra-fine water mist that rises up and works with the under fuel bed lighting to give a fully three dimensional fire effect. The result is so authentic that it is regularly mistaken for true flames and smoke.

Product Specification
