Product Description

This 3 sided gas fire is sure to make a statement in any room, even when turned off! It is perfect for subdividing a large open plan area (e.g. Kitchen / Dining etc).

This fire will need to be installed into a false chimney breast, made from 1000 degree rated heat resistant materials. The construction of this wall is a specialist task and should not be carried out by an inexperienced gas engineer.

We offer a full design service and can build your vision from start to finish.
